DNA Preservation Services • Medical DNA Testing Services

DNA AUTHORIZATION FORM

IMPORTANT: DNA preservation is not possible after cremation or burial. Please notify your funeral service provider immediately if you wish to save a DNA sample.

SecuriGene DNA Capsule

DNA encodes information about every individual, ranging from hair color, eye color and other physical traits, to inherited health risks, family medical conditions and ancestral origins. When a person passes away, this information is often lost forever - making DNA preservation a vital end-of-life consideration. This information can also be valuable for future healthcare purposes, as medical professionals are increasingly relying on genetic testing to determine different cancer types, optimal drug dosage levels, and heritable disease risks to help other members of the family. Learn more at www.SecuriGene.com/DNA

If you choose to proceed with this service, notify your funeral service provider immediately. A blood or tissue sample will be sent to SecuriGene for processing. The laboratory will extract, purify and preserve the DNA, if any, then seal the sample and return it to you for safekeeping along with full reports certifying the quantity and purity of the banked DNA.

Select one of the following options:

- ☐ **Yes** - I would like to proceed with DNA preservation.
- ☐ **Still Deciding** - I would like to learn more about DNA preservation before making a decision, but authorize my funeral provider to collect a DNA sample before cremation or burial and hold the sample for up to 3 days while I assess my options.
- ☐ **No** - I have read the above and understand that DNA will be permanently destroyed after cremation or burial and choose to decline this service.

PLEASE SEE BACK OF SHEET FOR MORE INFORMATION AND COMPLETE LIST OF TESTS

Questions? Speak with a SecuriGene specialist by calling 1 (877) 714-6359 or e-mail support@securigene.com

DNA testing services provided by SecuriGene Technologies Inc. - a division of Canada's largest DNA testing facility, processing over 150,000 samples annually. The laboratory undergoes rigorous quality control procedures and participates in nationally recognized proficiency testing programs to ensure consumers receive the highest quality DNA testing services available.

DNA Banking & Testing Consent Form

Please complete and submit this form to SecuriGene together with the sample for processing.
NOTE: This consent form replaces the consent form inside your DNA collection kit.

Kit ID#:

V062021US-HCP

DNA BANKING & PERSONALIZATION OPTIONS

Preserve the genetic legacy of your loved one for generations to come. The DNA Capsule captures the entire genetic blueprint of an individual for memorial purposes and future testing opportunities.

☒ **DNA Banking Capsule** (post-mortem) \$498.00

☐ **Additional DNA Capsule** (up to 3 additional DNA Capsules per kit) \$250.00 each

☐ **Name & Date Engraving**
Please indicate the name, year of birth and year of death below:

John Smith
1932 - 2020
21129829

Example

\$29.00

☐ **Custom Engraving**
Limited to 20 characters per line, with a maximum of 5 lines:

In Loving Memory of
John Smith
August 2, 1932 to
January 23, 2020
21129829

Example

\$49.00

HEALTH & DISEASE DNA TESTING

☐ **Standard Health Panel**
Includes cancer screening (BRCA1/BRCA2), basic cardiovascular (APOE), Alzheimer's disease, Parkinson's disease, and an analysis of genes associated with over 357 health conditions. \$420.00

☐ **Comprehensive Health Panel**
Our Standard Health Panel, **plus** Type 2 Diabetes testing, complete cardiovascular health screening (full panel), and an analysis of genes associated with over 634 health conditions. \$720.00

MATERNAL DNA ANCESTRY TESTING (available for males & females)

Determine both ancient & recent ancestry on your maternal lineage by analyzing Mitochondrial DNA (mtDNA). This test is available for both males & females.

☐ **Basic Ancestry (Maternal)**
This mtDNA HVR1 region test provides an in-depth look at your family's maternal lineage. \$119.00

☐ **Complete Ancestry (Maternal)**
Complete mtDNA sequencing provides the highest possible resolution for exploring your family's maternal lineage. Ideal for individuals looking to make full use of our online Family Finder feature. \$528.00

PATERNAL DNA ANCESTRY TESTING (available for males only)

Determine both ancient & recent ancestry on your paternal lineage by analyzing Y-DNA. This test is available for male individuals only, as females do not have a Y-chromosome.

☐ **Basic Ancestry (Paternal)**
This Y-DNA 20 STR marker test provides an in-depth look at your family's paternal lineage. \$119.00

☐ **Complete Ancestry (Paternal)**
101 marker Y-DNA sequencing provides the highest resolution for exploring your family's paternal lineage. Ideal for individuals looking to make full use of our online Family Finder feature. \$339.00

PATIENT INFORMATION

First Name: _____ Middle Name: _____

Last Name: _____ Gender: _____ Date of Death: _____

Has the body been embalmed before sample collection? No ☐ Yes ☐

Did the individual ever have a stem cell transplant? No ☐ Yes ☐

If you have selected "Yes", please collect extra samples using the Back-Up Kit provided

SHIPPING INFORMATION FOR COMPLETED DNA CAPSULE & REPORTS

OTHER SERVICES & SPECIAL REQUESTS

If there is another DNA test you wish to order (i.e. paternity, profiling etc), please specify below, or request a callback from our specialists by providing your contact details:

CLIENT CONSENT

- a. I, the undersigned, consent to the collection of the sample from the individual specified in this form for DNA banking and testing purposes by the Sample Collector and/or SecuriGene and its respective testing laboratory.
- b. I agree that if I have signed this consent for or on behalf of the individual specified in this Consent Form, I hereby represent and warrant to SecuriGene that I have the unconditional right to provide this consent for and on behalf of such person and to permit SecuriGene to rely upon it. I agree that SecuriGene, the Lab, the Sample Collector(s) and their respective mandataries and employees are not liable in any way for any damages, costs or expenses incurred for any reason in connection with the sample collection, DNA banking, DNA testing and/or shipping process. I understand and accept that if a sub-optimal or compromised sample was submitted to the laboratory for analysis, the use of DNA for specific downstream applications may be limited. DNA purification and isolation removes most non-DNA contaminants, but will not increase the total amount of DNA submitted, or repair degraded or cross-linked DNA.
- c. I verify the information provided in this document to be true.
